

Trainings:

At FOAT, we provide standard trainings programs designed to strengthen the capacity of farmers, agribusinesses, NGOs, and institutions in sustainable and certified organic agriculture.

Our training programs combine practical field experience, scientific knowledge, and internationally recognized organic standards to enable participants to improve productivity, regenerate soils, conserve biodiversity, and access premium markets for organic products.

All courses are delivered through participatory learning approaches, including interactive workshops, field demonstrations, practical exercises, and group discussions to ensure participants gain both theoretical knowledge and practical skills.

1. Organic Agriculture Basics – MAY, 2026
